

ClayShay™ feels like clay — sets like maché.

Manufacturers of Fine Clays and Machés

Clayshay™ is innovative, safe and non-hazardous with no asbestos and 0% shrinkage. Mix thick to feel like clay or mix thin to feel like maché.

This product has a double set to lock in details and eliminate shrinkage. It has a light brown body, is lightweight, strong & very versatile for universal applications as a clay or a maché. It can be carved, filed, sanded, painted, or otherwise finished after set-up.

BE CREATIVE WITH TRADITIONAL OR NEW USES!

USES INCLUDE . . . sculpting, design & art prototypes, casting, model construction, theatrical props, model railroad scenery, artificial rocks, habitat, base & mannikin building, wildlife art, conventional clay & maché hand lay-up applications, more!

Arts and crafts have never been easier!

Aves® ClayShay™ has universal applications as a clay or a maché. It is safe, non-flammable, and non-hazardous.

Features and Benefits

- Minimum dust when mixing
- High Quality Results
- Multi-purpose
- Light Brown Color
- Shelf life of years
- Easy Clean-up
- Lightweight
- Strength
- Economical
- 0% Shrinkage
- Fun to Use!
- ClayShay™ has a double set to lock in details & eliminate shrinkage. The first soft set occurs about one hour after mixing ClayShay™ with water. The second, hard set, occurs when moisture dries off in 1 to 4 days.
- ClayShay™ can be carved, filed, sanded, painted or other wise finished after set up.

DIRECTIONS FOR USE

1. Measure dry paper maché powder as needed and mix with water to desired consistency. Maché is now ready for use.
2. Set-up time is about 1 hour, depending on the mixed consistency. ClayShay can be carved after set-up time has passed and until it is fully cured. Maché is fully cured when moisture dries off in 1 to 4 days. Simple water clean-up. Finish and paint as desired.

*Suggested ratios: 5 parts maché to 1 part water, claylike applications. 3 parts maché to 1 part water, batter like for casting & molds. *Keep out of reach of children...[S 2] Safe for all ages when used as directed. *Wear goggles & dust mask when sanding cured maché...[S 39/36]

*Conforms to ASTM D4236.
