

Aves® ClayShay™ feels like clay — sets like maché.

Manufacturers of Fine Clays and Machés

Clay and maché. Aves® ClayShay™ is the best of both. It feels like clay and sets like maché.

ClayShay™ is for universal applications as a clay or a maché. It is a dry powder ready for use with the addition of water and has about a one hour set time. It offers 0% shrinkage. It has a light brown body, is light weight, non-toxic, strong and very versatile. Aves® ClayShay™ is a new, innovative product!

BE CREATIVE WITH TRADITIONAL OR NEW USES!

USES INCLUDE . . . home, professional and industrial applications, school & classroom projects, professional sculpting, design & art prototypes, casting, molds and reproduction items, model construction, theatrical props, model railroad scenery, substructures, artificial rocks, habitat & base building, taxidermy, mannikin building, wild life art projects, and other conventional clay, maché, and hand lay-up applications.

Arts and crafts have never been easier!

Aves® ClayShay™ has universal applications as a clay or a maché. It is non-toxic, non-flammable, and non-hazardous.

Features and Benefits

- Minimum dust when mixing
- High Quality Results
- Multi-purpose
- Light Brown Color
- Shelf life of years
- Easy Clean-up
- Lightweight
- Strength
- Economical
- 0% Shrinkage
- Fun to Use!
- ClayShay™ has a double set to lock in details & eliminate shrinkage. The first soft set occurs about one hour after mixing ClayShay™ with water. The second, hard set, occurs when moisture dries off in 1 to 4 days.
- ClayShay™ can be carved, filed, sanded, painted or other wise finished after set up.

FORMULA GUIDELINES

Clay-like applications need less water.
Maché-like applications need more water.

- A. 2 parts Aves® ClayShay™ -to- 1 part water**
(Thinnest, pourable mix for splash coats and castings.)
- B. 3 or 4 parts Aves® ClayShay™ -to- 1 part water**
(Thin mix, handles like maché) batter like consistency
- C. 5 parts Aves® ClayShay™ -to- 1 part water**
(Thicker mix, feels like clay - sets like maché!)
- D. Your choice of water to ClayShay™ ratio!**
(Recommended at least 2:1 ratio minimum)

DIRECTIONS FOR USE

1. Measure dry ClayShay™ powder as needed & mix with water to desired thickness. *(See formula guidelines).*
2. ClayShay™ is ready for use. Set up time for product is about one hour. ClayShay™ is fully cured when moisture dries off in one to four days.
3. Simple water clean-up.

AVES® fine clays and machés are available in convenient sizes.
